Reference - BD2100

The **Navigator™** line of moisture meters and the Bluetooth-enabled **EDGE™** App provide solutions to a range of problems in water damage restoration, construction, and virtually any building or inspection field.

With the **EDGE™** App, you can customize species selection and MC alerts, creating a single moisture meter that can perform various tasks to suit your application, with just a few clicks.

Large, custom display with auto backlight - easy to read under all conditions.

You can store unlimited readings and export them as either a full or partial set as you require. Each reading is automatically stored with a geotag and timestamp.
